Qualification and Experience

Film Production: Vast knowledge and experience in pre and post film production from narrative, documentaries and short films to live music performance, music videos and commercials. With each project I've had the opportunity to shepherd them through all stages from initial concept, written treatment and pitch through to production and the final edit and mix. Along with this I've also had in depth experience in post heavy visual effects projects in both leading teams and as part of one.

Creative Direction/Graphic Design: I've worked on a diverse range of projects from illustration and design for the street culture market to corporate branding in the wine industry. Through these projects I've had responsibilities from designing logos and style guides to developing and implementing the complete rebranding of companies. I also have many years experience in the motion graphics industry as a designer and art director, working with many of the top studios and artists in the industry and have often combined my skills as a graphic designer with my filmmaking abilities.

Education

1994-1998 California Institute of the Arts
B.F.A Graphic Design

2015 U.C.B.
Sketch 1-2

Technical Proficiency

Adobe Creative Suite

(Premier, After Effects, Photoshop, InDesign, Illustrator, Acrobat)
